

TG GERMAN METALCRAFT INDUSTRIES PVT. LTD.

About TG German Metalcraft Industries Pvt. Ltd.

TG German Metalcraft Industries Pvt. Ltd. is a German-led company specializing in metal fabrication and mechanical engineering, based in Uttarakhand, India.

We focus on the manufacturing of high-quality welded structures, precision metal components, and industrial assemblies for demanding applications. Our work combines German engineering standards with practical, efficient local production.

From concept and design to fabrication and final delivery, we provide reliable, solution-oriented services tailored to the needs of industrial clients. Beyond technical excellence, we are committed to building sustainable industrial structures and long term partnerships that create real value.

History

Uttarakhand faces industrial underdevelopment despite a young, motivated workforce. Bridging this gap, through quality manufacturing, real employment, and practical training, is both a business priority and a social responsibility for TG German Metalcraft.

Vision

We are an ambitious young team shaping the future of precision metal fabrication in India, combining German-quality standards with Indian production efficiency.

Our goal is to serve industrial clients across India and internationally, while building a sustainable manufacturing ecosystem in Uttarakhand, creating skilled employment, supplier networks, and long-term industrial partnerships.

We represent a new generation of Indian manufacturing enterprises, locally rooted, globally connected, and quality-committed.

Mission

TG German Metalcraft aims to combine high-quality engineering fabrication with meaningful economic impact in the region where we operate.

As an internationally minded company with strong local roots, we manufacture drawing-accurate components, build reliable supply chains, and create real employment opportunities, particularly in structurally underdeveloped regions.

We generate measurable value for our industrial clients while making a lasting contribution to skills development and dignified employment on the ground.

German precision. Indian agility. Delivered on time.

Conclusion

We invite industrial clients, OEM partners, and long-term collaborators to build with TG German Metalcraft. This is more than a fabrication contract, it is a partnership founded on quality, transparency, and shared success.

TG German Metalcraft is a bridge between German engineering excellence and India's manufacturing potential. Working with us means working with a team that is driven by precision, accountability, and a commitment to getting it right, every time, every batch.

Precision Metal Fabrication

- **MIG, TIG and MAG welding** across all positions, structural joints, brackets, sub-frames and multi-part assemblies.
- **Machine support frames** in MS and SS, stress-relieved, squared and levelled to drawing tolerance.
- **Structural fabrication** columns, beams, trusses and welded frameworks for industrial applications.
- **Industrial platforms** access platforms, mezzanine decks, elevated work structures with grating and handrail integration.

CAD Design & Engineering Support

- **Design optimization** for manufacturability, cost efficiency and structural performance.
- **Technical drawing review**, Feasibility reviewed & confirmed without delay
- **Modelling of components** and assemblies for fabrication, validation or simulation.

Quality & Supply Chain

- **Dimensional verification** and visual weld inspection on every order before dispatch.
- **Material certificates** from established suppliers available on request.
- **Itemised, transparent quotations**

Social Responsibility

As a company, we believe that business also carries responsibility towards society. We actively support social initiatives and community-focused projects aimed at improving living conditions and creating opportunities for people in need. Through this, we aim to contribute to sustainable social development and make a positive impact beyond our core business activities. For us, building a company also means creating value for the community and taking responsibility where it is needed.

Sheet Metal & Component Manufacturing

- **CNC plasma cutting, press brake forming** and assembly housings, enclosures, guards and covers in MS or SS.
- **Load carriers and racks** built to your payload, footprint and handling specification.
- **Precision machined components** turned, milled and drilled to drawing tolerance (shafts, brackets, flanges, housings).
- **Full-service contract manufacturing** material sourcing, cutting, forming, welding, finishing and dispatch.

Skills Development & Employment

- **Practical, on-the-job training**
- **Direct employment** in precision fabrication for young people from Uttarakhand and surrounding regions.
- **Process discipline and quality training** aligned to Standard welding principles.
- **Long-term skill transfer** building a qualified local workforce for Indian manufacturing.

Social & Industrial Impact

- **Promoting dignified employment** through inclusive hiring and meaningful engagement.
- **Building local supply chains** reducing dependency on distant procurement for industrial clients.
- **Reliable, long-term partnerships** trial orders start at 1–5 pieces, scaling to full production.
- **Pan-India and international dispatch** via reliable logistics partners
